

## ANNOUNCEMENT

### **Farris Engineering, Curtiss Wright Industrial Division, has appointed Portersville PRD, as our official Manufacturer's Representative in Michigan.**

**Farris Engineering** is pleased to announce the appointment of Portersville PRD as the sales, support and service representative for Farris Pressure Relief and Safety Valves in Michigan. Portersville PRD has excelled in bringing expertise and solutions for all your pressure management needs from application engineering, sizing, selection, testing and repair.

As the local Farris representative and part of the Farris Authorized Service Team, or **"FAST" Center Network**, Portersville PRD will provide overall life cycle management support for all pressure relief valve products. Farris' FAST Centers provide customers with local "VR" certified service by factory-trained technicians working in independent repair, service and stocking centers. Portersville PRD provides National Board qualified assembly of Farris Engineering pressure relief valve and repair services for all brands and manufacturers, including mobile units for on-site and emergency service.

The Portersville PRD sales and service team is ready to support you with industry leading process safety with both shop and on-site technical service. Core technologies include pressure relief valves, control valves and valve automation.
